Nov. Dec / April- May 2023- 2024 Examination

Name Of Student : Aru Vishal Vinod

Roll No : 01 Date : 1-5-2024

Class : T.Y.B. Pharm Semester : II

Subject : Human Anatomy and Physiology II Subject Code : BP201T

Head	Academic Activities			Total (03M)

Assignment Enlist composition of saliva, gastric juice, pancreatic juice, bile, intestinal juice with their function.

Ans. Composition of saliva

Composition: Saliva is the combined secretions from salivary glands and the small mucus-secreting glands of the oral mucosa. About 1-1.5 liter of saliva is produced daily and it consists of water, mineral salts, a digestive enzyme: salivary amylase, mucus, lysozyme, immunoglobins, blood-clotting factors.

Function of saliva

1. Chemical digestion of polysaccharides: Saliva contains the enzyme amylase that brings the breakdown of complex sugar including starches, reducing them to the disaccharide maltose.
2. Lubrication of food: The dry food entering the mouth is moistened & lubricated by saliva before it can be made into bolus (swallowing).
3. Cleaning and lubricating the mouth: An adequate flow of saliva is necessary to clean the mouth and to keep it soft, moist and pliable. It helps to prevent damage to mucous membrane by rough or abrasive food.
4. Non-specific defence: Lysozyme, immunoglobins & clotting present in saliva combat invading microbes.
