Guidelines for energy conservation implemented at SSJIPER

1. To carry out a widespread energy audit of the college to identify areas where energy consumption can be reduced.
2. To develop a plan to promote the use of LED light energy sources identifying suitable locations for assessing the feasibility area.
3. Promote students, faculty, and staff to adopt energy efficient practices such as turning off lights and electronics when not in use, using public transportation or carpooling to reduce transportation-related emissions, and using reusable water bottles and coffee cups.
4. Replace traditional light bulbs and tube lights with energy-efficient LED bulbs and tube lights. This will reduce energy consumption and lower electricity bills.
5. Replace old and inefficient appliances such as air conditioners, refrigerators, and water heaters with newer, more energy-efficient models. This will also reduce energy consumption and lower electricity bills.
6. Develop a waste management plan that includes recycling and composting. This will help reduce the amount of waste sent to landfills and also reduce greenhouse gas emission associated with waste disposal.
7. Conduct regular energy audits and review progress on energy conservation measures to ensure that the college is meeting its energy conservation goals.

Waste Management Guidelines

Relegate the waste: The first step in waste management is to classify the waste into different types such as biodegradable, non-biodegradable, hazardous and e-waste. This will aid proper disposal and re-cycling procedures.

Set up waste disposal section: At various places around the campus, laboratories, classrooms, canteens and administrative offices. Ensure that waste disposal sections are clearly marked and easily assessable.

Educate student & Staff: Importance of waste management, harmful effects of improper waste disposal and benefits of recycling. Organize regular campaigns, seminars and workshops.

Implement Waste segregation: Students and staff showed courage to separate waste into different categories, at the source itself. Provide separate bins for waste and ensure proper disposal of waste.

Encourage Re-cycling: Start a recycling centre on campus to recycle paper, plastic, glass and metal waste. Encourage students and staff to reduce waste by using reusable bags, bottles and containers.

Monitor waste management: Regularly monitor waste management processes to ensure proper disposal and recycling of waste. Keep a record of them.

These guidelines can effectively manage the waste generated in the Sureshdada Jain College of Pharmacy and contribute to a clean and healthy environment.

Dear students, staff and faculty members,

We would like to convey to your awareness that Sureshdada Jain College of Pharmacy has implemented a plastic ban campus. **The use of plastic bags, water bottles, straws, and any other plastic item is strictly prohibited.**

This assessment has been made in an effort to reduce the amount of non-degradable waste generated on campus and to promote environmental sustainability. We apply for all members of the college community to cooperate in the implementation of this ban. Thank you for your cooperation.

We promote everyone to bring their own reusable bags, bottles, and apparatus to minimize the use of plastic on campus. Let's all work together to protect the environment and create a Sustainable future.

Thank you for your cooperation.

Report on Green Campus and Environment –Facilities and Activities at Sureshdada Jain College of Pharmacy, Jamner

As the Principal of Sureshdada Jain College of Pharmacy, I am Pleased to tale on various initiatives taken by our institution to promote green campus and environment friendly facilities and activities.

We believe that it is our responsibility to reduce our environmental impact and promote sustainable practices. To this end, we have implemented several measures to minimize our Carbon footprint and create a cleaner and greener environment for our students and staff.

Waste management: we have implemented a source segregation system for the collection of dry and waste, with color coded waste bins placed at every corner and common room, our housekeeping staff is trained to follow these waste management practices, and collected waste is handed over to the local authority for proper disposal.

Paperless operations-we have a developed ERP System for all academics and administrative Activities to minimize paper usage. This includes online admission-learning platforms and digital record keeping.

Energy Conservation: we have implemented several measures to conserve energy including using energy effective lighting and conditioning system, installing LED light and encouraging the uses of natural lights and ventilation.

Water Conservation: we have installed rain water harvesting system, low flow fixtures and reduce wastage

Green spaces: We have created green spaces on our campus, including botanical garden, herbal garden. We promote biodiversity but also provide a natural space for our students to relax and unwind.

Environment: Friendly activities: we organize various environments friendly activities including tree plantation drives, eco-friendly celebration of festivals and awareness campaigns on environmental issues.

Notice-Green policies implemented by Sureshdada Jain College of Pharmacy, Jamner

Dear Students and staff,

We are happy to announce that Sureshdada Jain College of Pharmacy has implemented various green policies to decrease our environmental impact and support sustainability.

Our college has implemented a source isolation system for the collection of dry and waste with color coded waste bins placed at every corner and common room, our housekeeping staff is trained to follow these waste management practices, and collected waste is handed over to the local authority for proper disposal.

To minimize paper usage, we have developed enterprises resources planning system for all academics and administrative activities. Additionally we collect the disposal of liquid waste from labs and washrooms through a well-constructed drainage system.

In the terms of non-degradable waste management, and faculty members guide students on the proper use and handling of chemicals in the labs, we promote the use of less hazardous chemicals. We also disposal of water soluble chemicals through the sewage system after solubilizing them in water.

Moreover, we have banned the use of plastic on our campus to reduce non-degradable waste.

We wish that these policies will generate a cleaner and greener environment for all us to survival and work in. We support everyone to maintain these initiatives and help us to make a positive impact on environment.

Thank you for your collaboration.

Water Management-

The water for all other purposes is supplied through another set of distribution pipes. The college has one wells with ample water. The ground water from the wells is pumped into the storage tanks / elevated service reservoirs located at different places in the campus. The water is distributed through well-laid pipe network.

Entire distribution system is well supervised by the college administration to ensure that there are no leakages and wastages of water through Leakages in the pipelines and the water-taps etc. Regular cleaning of the water tanks is regulated by the administrative staff of the college. All the stakeholders of the college are well-educated to use water economically and Efficiently. Rainwater from the different college buildings is taken to the wells for ground-water recharge. A proper care is also taken to keep the Rooftops cleaned so that unnecessary garbage does not mix with the rainwater leading towards the well. The inlets of these tanks is controlled by the ball-valves to avoid water overflows.
