than 60% of them being in the age-group 15-34 years as per Indian Central Govt. As of 2018- WHO Global Status Report on Road Safety, Road crashes are the leading cause of death among the youth (5-29 years of age) in the world with India being the table-topper across the globe with more than 3 lakh road crash fatalities. Indian Road Safety Campaign, Solve in India works with a vision to make Indian roads safer via youth-led community driven multi- sectoral initiative.

As we all are well aware that road accidents, injury and death has been very common now-a-days. People not following the road traffic rules and road safety measures are the main cause of such accidents on the roads. We always hear in the news or by our friends about the road accidents because of the wrong side driving, lack of road safety rules, measures, high speed, drunk driving, etc. Government has made variety of road traffic and road safety rules for everyone using road for their safety and reducing the number of daily road accidents.

Road safety risks have been increased because of the driver distraction due to the use of cell-phone or other electronic devices while driving. Lack of knowledge and awareness regarding road traffic rules and regulations, violation of traffic rules, flaws in road design and engineering, along with driver behaviour, can be overcome with concerted effort. Road safety measures are the tools can save from the expensive traffic fines, serious offences, removal of driving licenses, etc. Pedestrians also know the rules of walking on the road like proper use of crosswalks, use of zebra crossing, etc.
